1. The following is an examiner's statement of reasons for allowance: Independent claim 1 requires the combination of features of "storage means for storing a plurality of electronic data as target comparison images; input means for inputting a reference comparison image obtained from a printed material; segmentation means for segmenting the reference comparison image into a plurality of regions based on an attribute; grayscale feature amount extraction means for extracting a grayscale feature amount from a region having a predetermined attribute among the plurality of regions segmented by said segmentation means; retrieval means for retrieving a target comparison image corresponding to the reference comparison image from said storage means by using the grayscale feature amount extracted by said grayscale feature amount extraction means; and processing means for extracting the image retrieved by said retrieval means from said storage means and processing the extracted image". Independent claims 18, 19 require similar combination of features. None of the prior art discloses such combination of features. The prior art references found are Sato (6,181,818), Okajima et al (5,917,940) and Barber et al (5,751,286). These references fail to disclose the claimed invention.
